

Notice to Contractors/Installers

NOTICE TO SIGN AND SECURITY SYSTEM CONTRACTORS AND INSTALLERS

The Lynnwood Municipal Code requires that **contractors and installers** apply for the Electrical Permit and request inspections, **not the customer**.

The City of Lynnwood issues its own electrical permits and completes its own inspections. The City requires that all installations to be inspected are completed prior to the inspection. The City also requires the permit purchaser to provide access to perform the inspection.

Please call the inspection hotline at (425) 670-5550 by 3:00 PM for an inspection the next business day. Call from a land line and have your permit number ready.

Failure to comply will result in adjustments to permit fees, re-inspections, and possible business license revocation.
